

PCI Express Card > 1 x external 1 x internal USB 3.0

Description

The Delock PCI Express card expands your PC by two USB 3.0 ports. You can connect USB 3.0 devices internally and externally like e.g. docking station, card reader, hub, external enclosure etc. to the card. Since the USB-A interface is compatible to its forerunners USB 2.0 and USB 1.1, you can still use your existing USB devices.
